LEGEND

We have the best team

THE BWS FAMILY

Best Way Stone is about endurance: products that last, styles that last and as a family-owned and operated business since 1965, we want our relationships to last, too. That's why we continue to craft our products locally, independently and back it with a transferable lifetime guarantee. We're family and we're here for you.

INDEPENDENTLY OWNED; FAMILY OPERATED

Best Way Stone is one of only a few independent family-owned, pre-cast concrete manufacturing businesses. And that philosophy permeates everything we do. Our team is family – and one that puts your needs first. Even as we've grown and expanded to new locations, we've still maintained our flexibility to respond quickly to both market demands and home-owner needs. This allows us to innovate quickly.

OUR DEALER NETWORK

Our extended family includes an extensive network of dealers located throughout Ontario, Quebec, and North-East Michigan. Our dealers will help you visualize your landscape by pairing the right products with your project design and style needs.

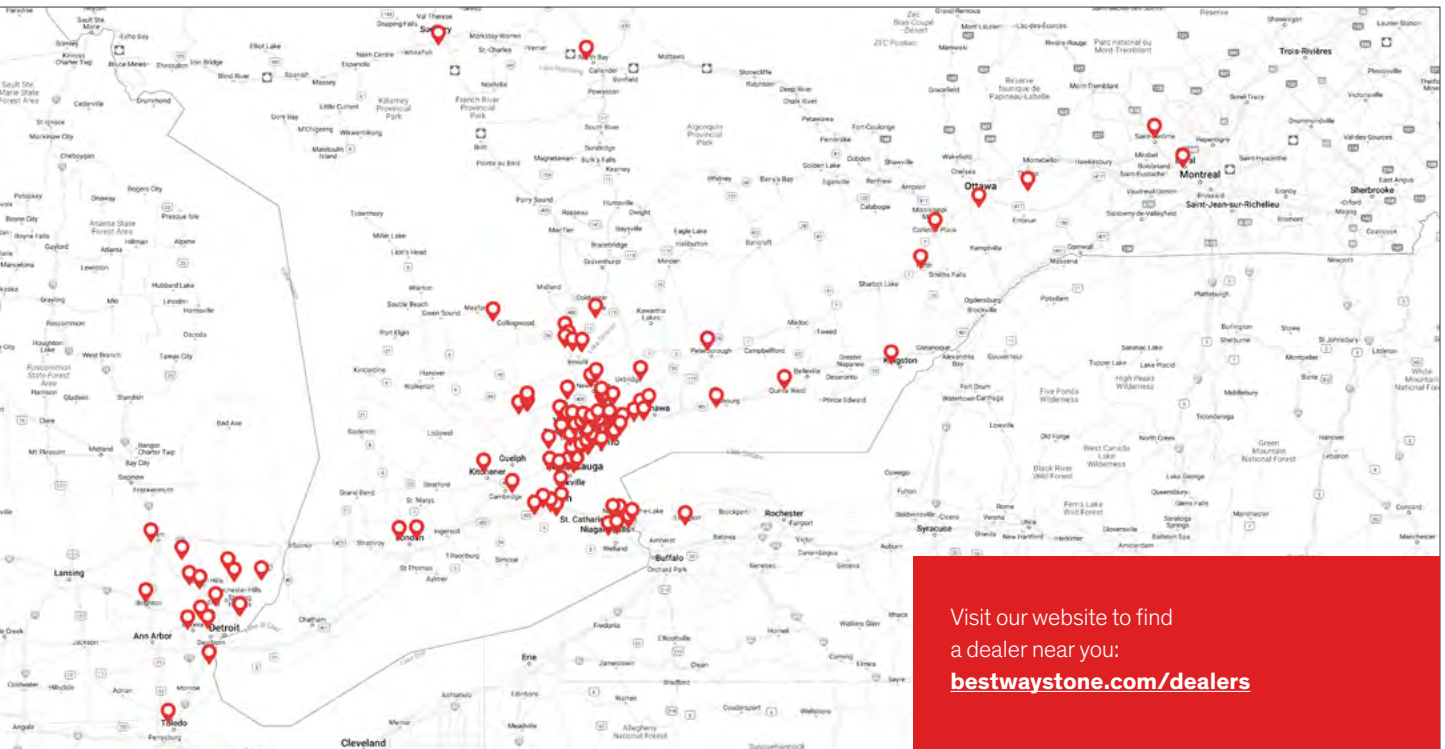

THE RIGHT PARTNER

Hiring a qualified hardscaper makes installing hardscape products a much more efficient experience. When hiring a qualified professional we recommend they follow industry-standard guidelines.

We recommend collecting project references and samples of previous work. Make sure they offer a comprehensive warranty and have all the required insurance and licenses.

Any certified contractor will understand the industry standards for installing hardscape products – you can download a copy of these guidelines by visiting masonryandhardscapes.org.

Visit our website to find a hardscaper near you: bestwaystone.com/hardscaper

Visit our website to find a dealer near you: bestwaystone.com/dealers

The best products built using the best practices.

THAT'S THE BEST WAY.

We have a good foundation

MANUFACTURING LEADS DESIGN

Hardscaping solutions should be designed to last. So our philosophy is that manufacturing processes should always influence product design.

THOUGHTFUL INNOVATION

We've built production facilities and equipped them with manufacturing technology and our own proprietary processes that are engineered specifically to ensure our products are well-planned, well-designed and well-made.

With two state-of-the-art manufacturing facilities, and dealers to support you across Ontario, Quebec, Atlantic Canada, Michigan and Ohio, we're completely independent and able to both hear and respond to your needs.

Our products are resistant to the elements and meet or exceed all industry standards.

We manufacture our products using two key ingredients: quality and care. All are manufactured to meet and exceed their respective North American standards set by both the CSA and ASTM.

That commitment to quality is backed by our transferable lifetime guarantee on the structural integrity of our pavers. You can learn more about our transferable lifetime guarantee on our website: bestwaystone.com/warranty.

We have a curated product line

Today's landscapes are thoughtfully and creatively built for living, working and playing, and bring together form and function for a quality outdoor experience. No matter what budgets or timelines await you this year, there are plenty of ways to incorporate modern tastes into hardscaping designs. Whether you're planning a full outdoor revamp, or just installing a new element or two, selecting the right product can make all the difference. We make it less overwhelming by providing a highly curated product portfolio that works seamlessly together.

FLEXIBLE SOLUTIONS

Interested in being environmentally conscious? Permeable pavers offer some great advantages for water management and conservation. Looking to stand out? Mixing colours and textures can create more geometric patterns, adding touches of personality to otherwise uniform spaces.

FORM

Contrast with shapes and textures to create a more rustic or natural topography.

SCALE

Combining various sizes draws attention to key areas in your landscape.

TEXTURE

With a variety of surface textures to choose from, we have your landscape style covered. Make a bold statement by combining different product textures in your design to create visual interest.

Combining quality hardscape materials is the best way to create your dream landscape.

One of the most common questions we get from customers purchasing hardscape products is "how they will wear over time?". Our recent technological advancements provide layers of enriched surfaces and colour, bringing product aesthetics and performance to the next level.

COLOUR

Lighter colours can make a landscape seem larger, while darker colours make large expanses feel more intimate. Mix the two to create areas of personality and warmth.

Designer Toolbox

Add some contrast to your landscape design by mixing and matching our product line. Choose from smooth, soft, textured or cobblestone surfaces, light and dark colour blends, small or large slabs & pavers.

Our pursuit of technological advancements provides layers of enriched surfaces and colour, bringing product aesthetics, quality and performance to the next level.

The DesignLoc surface refinement technology is a strategic mix design that produces a highly controlled and refined surface offering with integral colouring and smooth touch surface.

ChromaTec protective surface enhancer adds a level of protection that helps resist the threat of stains from foreign elements while enhancing the vibrancy of the coated surface.

NanoBlast provides a fine blasting to the surface of the product, exposing specially selected granite aggregates, while leaving a durable and highly defined smooth finish for increased comfort.

New for 2024

Take a look at what's new for the 2024 season. At Best Way Stone, we are constantly pushing the envelope of product design.

VANGUARD

Introducing the Signature Series Paver – A classic smooth surface with subtle edges, measuring 100mm thick. Offered in three distinctive colours, with two featuring an exclusive edge surface finish. Vanguard is suitable for both pedestrian and vehicular commercial applications

LYRA 24" x 36"

The Lyra slab provides both a modern design and a highly detailed surface. Taking advantage of Best Way Stone's DesignLoc surface refinement technology, Lyra provides a contemporary smooth finish, and is offered in a variety of colours.

CARRARA COLORADO GREY PEARL BRIGHTSAND ECLIPSE SILVERLIGHT STORM

PRISMA

The Prisma paver blends timeless aesthetics with a modern twist, ideal for cutting-edge hardscape designs. Its elongated hexagonal form brings a distinctive geometric flair to landscaping, seamlessly integrating with various contemporary outdoor areas. Elevating projects, the Prisma introduces chic style and dimension.

CARRARA ULTRA BLACK

AUTUMN HILL

Introducing our new 2024 colour, Autumn Hill, now available in our Trevista product line. This warm and inviting shade captures the essence of fall, with a palette blending cream and brown tones to evoke the rich and cozy atmosphere of an autumn landscape.

2024 Lookbook

LIVE
WORK
PLAY

Whatever your purpose, Best Way Stone brings your vision to life.

A well-designed outside space not only adds property value, it also creates a sense of joy every time you return home. Over the past few years homeowners have found creative ways to build high-impact front entrances and restful backyard retreats that are built to last, so they can be enjoyed during any season.

Here are a few of our favourites.

TREVISTA TEXTURED (CARRARA)

“

Every new project is a fresh reminder of the impact landscaping can have a home's curb appeal. At the end of a project, we love stepping back and taking in that *wow* factor.

ABOUT PERMEABLE PAVERS

The Moderna and DC-80 Paving Stone are decorative and versatile single-shaped paving stone that provide stormwater control without sacrificing style or design.

Following PICP (Permeable Interlocking Concrete Pavement) standards, the Moderna Paving Stone provides a complete system, helping to eliminate runoff.

Benefits of Permeable Pavers:

- Eliminates surface runoff
- System design recharges groundwater
- Reduces need for snow removal
- Provides contaminant filtration
- Supported by paver lifetime guarantee
- Earn LEED® credits

Hardscaping Accessories

Best Way Stone has curated a collection of accessories to help you finish your outdoor space. This series consists only of the products we know and trust in our landscape designs – so you can trust them in yours, too.

JOINT SAND

Specially formulated mixture of graded sand and high-performance polymer binding agent designed for all paver and natural stone joints up to 4" (10 cm). It will remain stable and flexible in the most extreme weather conditions and freeze/thaw cycles when properly installed.

- Chimney caps
- Deck blocks
- Keystones

- Splash pads
- Step risers
- Window sills

Visit bestwaystone.com for more information.

Care & Considerations

Setting a base

The quality of work put into establishing a solid foundation is vital to the overall performance of your landscape design.

When properly constructed, a solid base foundation helps prevent paver settling, shifting, and water accumulation. Use of edge restraints and jointing sand is recommended as best practice by Concrete Masonry and Hardscapes Association.

When choosing and installing jointing sand, please ensure to follow the directions given by the manufacturer. To find out more about base preparation and installation practices, visit

masonryandhardscapes.org.

Colour distribution

When installing stone, we recommend you select a mix of materials from several different bundles to ensure a balanced distribution of surface colour textures and colour mixtures.

Always verify colours and products chosen for your concrete landscape project with your contractor or landscape designer prior to installation. Physical or printed colour samples are only representations of the chosen product. If you notice a discrepancy, notify us immediately before continuing with your project. Full installation is understood as your acceptance of the product's condition.

Concrete care

Maintaining the surface of your concrete pavers is essential to their aesthetic. Sealing your concrete pavers can enhance the colour, but it's optional as our pavers are just as durable with or without the addition of sealants. If you plan on sealing your concrete products, always follow the manufacturer's instructions for proper application.

Unfortunately, even materials as durable as concrete can scratch, chip, or stain if handled incorrectly. When compacting our pavers, ensure that a rubber membrane is added to protect textured surfaces from potential damage. Use a rubber blade when removing snow from the surface of our pavers to prevent surface scratching and damage. Best Way Stone is not responsible for the damage left by the misuse of compaction or snow removal equipment.

Efflorescence

Efflorescence is that white, powdery substance that appears on the surface of concrete and it's a naturally occurring process. Efflorescence does not affect the structural integrity or strength of the product and will usually wear off over time – although special cleaners can be used to speed up its removal. For more information visit

masonryandhardscapes.org.

Choosing a Contractor

Although not required, hiring a qualified contractor makes installing stone a much more efficient and less stressful experience. When hiring a qualified professional we recommend they follow industry standard guidelines.

When hiring a contractor, we recommend collecting project references and samples of previous work. Make sure they offer a comprehensive warranty, and have all the required insurance and licenses. Any contractor will understand the industry standards for installing stone – you can download a copy to these guidelines by visiting

masonryandhardscapes.org.
